NFL Data Feeds API Pricing & Features – Goalserve Sports Data API Review

Are you searching for a reliable NFL data API to power your sports app, fantasy football platform, or betting website? Look no further than Goalserve, a leading sports data provider with more than 15 years in the industry. Their NFL API delivers real-time scores, live player statistics, fantasy data, and more—making it one of the most comprehensive football data feeds available today.

In this article, we'll explore the NFL API pricing, what's included in each package, who it's best suited for, and why Goalserve stands out as a trusted provider of American football data.

🔍 What Is the Goalserve NFL API?

The Goalserve NFL API provides real-time American football data, including:

- NFL & NCAA live scores
- Player statistics and fantasy points
- Box scores and play-by-play data
- Schedules and results
- Team rosters and injuries
- Historical stats and in-play odds

Delivered in both XML and JSON formats, Goalserve's API is compatible with virtually any tech stack, ensuring seamless integration for developers and businesses.

💲 NFL API Pricing Breakdown

Goalserve offers flexible pricing plans for different budgets and use cases. Here's a quick overview:

Plan	1 Month	6 Months	12 Months	Discounted Price
NFL/NCAA Live Data	$300	$1,500	$1,200	✅ SALE
US Sports Package	$400	$1,850	$2,500	✅ SALE
Full Sports Package	$800	$3,550	$4,000	✅ SALE

Each plan provides varying degrees of access, from core NFL data to full multi-sport coverage, including NBA, MLB, NHL, and more.

Who Can Benefit from Goalserve's NFL API?

Sports & Media Broadcasters

Live game stats and real-time scores can enhance coverage for:

- TV networks and streaming platforms
- Sports blogs and media outlets
- Podcasts and YouTube content creators

Sportsbooks & Fantasy Platforms

Integrate lightning-fast data feeds with minimal latency for:

- Fantasy football apps
- Sports betting websites
- Real-time odds comparisons

Coaches & Performance Analysts

Analyze player performance trends, past stats, and injury data to optimize training and gameplay strategies.

Developers & App Creators

Power your sports applications with live, accurate NFL data delivered via easy-to-integrate API endpoints in JSON or XML.

Coverage You Can Count On

Goalserve's football feed isn't limited to just the NFL. It also includes:

- NCAA Football (including Bowl games)
- CFL (Canada)
- AAF
- NFL Preseason and Playoffs
- College rankings and historical matchups

With 99% uptime, coverage across 20+ sports, and 24/7 support, Goalserve offers dependable and scalable data solutions.

Features That Set Goalserve Apart

- Real-Time Updates: Get updates within seconds of on-field plays.
